Of  
Sheffield.

# SROC 2012

## Breakout Session 1:

# Sheffield HEAR Implementation Project (SHIP)

Dr Helen Grindley (Chair of HEAR Steering Group)

Dr Helen Tattam (HEAR Project Support Officer)

# Sheffield HEAR Implementation Project (SHIP)

- SHIP Overview
- Discussion 1 (10 mins + 10 mins feedback)
  - Data capture mechanisms
- Discussion 2 (10 mins + 5 mins feedback per group)  
EITHER
  - Providing students with access to the HEAR before graduation (formative HEAR)OR
  - Enabling students to share their HEAR with third parties before and after graduation (interim and exit HEARs)
- Final Thoughts/Questions

# Sheffield HEAR Implementation Project (SHIP)

- Getting started
  - Reasons for senior management support
  - Establishing working groups (Steering, Academic, SU)
- Project management
  - 2 phases: wide HEAR consultation before technical development
  - Full-time project support (central & SU)
  - Key steps for commencing technical work:
    - Data mapping
    - Identifying overlaps with other institutional plans/projects
    - Process planning
    - Survey of data availability for 6.1
    - User consultation

# Sheffield HEAR Implementation Project (SHIP)

- Sheffield's technical situation
  - In-house student records system
  - University Portal – *means of providing formative HEARs*
  - Already produces Diploma Supplements (on request)
  - Electronic access cannot be given to third parties, or to students after graduation – *reason for Project DARE involvement*
- Areas for discussion (10 mins each, + 10 mins feedback)
  1. Data capture mechanisms
  2. EITHER Providing students with access to the HEAR before graduation (formative HEAR)  
  
OR Enabling students to share their HEAR with third parties before and after graduation (interim and exit HEARs)
